In general, firearms are objects that are intended for attack or defense, signaling, hunting, distance injection, marking, sport or play and in which projectiles are propelled through a barrel or in which solid bodies are fired in a targeted manner, the propelling energy of which is provided by muscle power or another energy source and can be stored or held by a locking device (e.g. crossbows, arrow launchers). A distinction is made between firearms that require a permit and those that do not. You need a small firearms license to be allowed to carry unlicensed firearms.
