Volltext	If you recycle, dispose of, collect or transport hazardous waste, this is subject to a verification procedure under waste legislation. This does not apply to private households and small-scale producers who do not generate more than two tonnes of hazardous waste per year. If you are required to provide proof and generate less than 20 tonnes per year and waste type, you can organise your waste via the collective proof of a carrier. This carrier will take part in the electronic records procedure on your behalf.
Erforderliche Unterlagen	• Prescribed forms of the Verification Ordinance • including suitable declaration analysis
Voraussetzungen	The certificates must be valid at the time of disposal.

Hinweise

Proof can be confirmed for a maximum of five years.

In Baden-Württemberg, hazardous waste for disposal must be disposed of. This regulation ensures that the capacities of the Billigheim hazardous waste landfill are utilised by waste producers and owners from Baden-Württemberg. This landfill is provided by the state for the disposal of hazardous waste.

However, they are not subject to the obligation to deliver:

- Small producers with no more than 2,000 kg of hazardous waste in total per year
- Producers who hand over their waste to the collector as part of a collective disposal programme. In both cases, the disposer or collector must be subject to the obligation to deliver.
- Waste producers who dispose of waste in their own facilities in Baden-Württemberg that were already in operation on 1 January 1996.
