Sachverhalt

Addressees of the subsidy:

Business establishments in the manufacturing sector as well as certain service providers* whose turnover is predominantly (more than 50 percent) generated from the activity according to the positive list (see Annex I of the GRW Guidelines) or whose supraregional sales are proven in the individual case are eligible for funding.

Business premises for the production of foodstuffs and luxury foodstuffs can only be supported if the goods produced in the business premises are actually sold predominantly supra-regionally.

The establishment and development of cooperation networks and innovation clusters can be supported if the Free State of Thuringia has a significant economic policy interest in their realization. In order to be classified as an innovation cluster, special criteria must be met by the recipient of the funding.

Non-profit, business-related, non-university research institutions in Thuringia are also eligible for funding.

Investment projects in establishments of the tourism industry can be funded if the Free State of Thuringia has a significant tourism policy interest in their realization.

Scope of subsidy:

The maximum subsidy values are 30% for small enterprises, 20% for medium-sized enterprises and 10% for large enterprises.

For investment projects of large enterprises in environmental protection, the maximum subsidy rate is 45 percent of the eligible costs (additional costs or costs for improving environmental protection). The total subsidy amount for the investment project may not exceed the notional subsidy amount that would result from the above-mentioned maximum subsidy value for large enterprises for the entire investment project.
