In general, firearms are objects intended for attack or defense, signaling, hunting, distance injection, marking, sport or play, and in which projectiles are propelled through a barrel or in which solid bodies are fired in a targeted manner, the propulsive energy of which can be introduced by muscle power or another energy source and stored or held by a locking device (for example, crossbows, arrow launchers). The handling of firearms is generally subject to a permit, unless it is fully or partially exempted from the permit requirement. A detailed list
