Sachverhalt

You do not need to have completed qualified vocational training or a course of study. It is also not necessary for your qualifications acquired abroad to be recognized. It may be helpful if, in addition to several years of professional experience, you can also demonstrate relevant theoretical knowledge (e.g. through certificates or diplomas).

The Federal Employment Agency must approve the employment before the residence permit is issued. It also checks whether certain requirements can be waived. The Federal Employment Agency grants its approval for a maximum of four years.

The residence permit is issued for a limited period. Its validity depends on your employment contract or the period of validity of the Federal Employment Agency's approval.

Under certain circumstances, the Immigration Office may require you to attend an integration course. This will then be noted on your residence permit.

If you are an employer and would like to hire an IT specialist from abroad, you can apply for the accelerated skilled worker procedure at the foreigners authority on behalf of the foreigner, which can facilitate and accelerate the entry of skilled workers.
