Teaser	As a rule, construction sites must be notified in advance to the responsible trade supervisory office or mining authority in the form of an advance notice.
Volltext	The advance construction site notice must be prepared by the client or a commissioned third party (e.g. architect). It must contain at least the following information: • Location of the construction site • Name and address of the client • Type of construction project • Name and address of the third party responsible instead of the client • Name and address of the coordinator • Estimated start and duration of the work • expected maximum number of employees on the construction site • Number of employers and contractors without employees expected to work on the construction site • Details of employers and contractors without employees already selected
Erforderliche Unterlagen	• health and safety plan, if applicable
Voraussetzungen	If you want to set up a construction site and it meets the following requirements, you must submit a construction site advance notice to the trade supervisory office or mining authority responsible for the location of the construction site. The mining authority is responsible, among other things, if the construction project is subject to mining supervision or if it involves underground cavity construction (tunnel, pressing, etc.). Requirements for the submission of a construction site
