Sachverhalt

the accompanying document for the transport of wine products online or by post to the responsible control authority at the loading point. You create the accompanying document immediately before transport, when the wine product has been loaded onto the transport vehicle and the final number of liters for transport has been determined. The accompanying document refers only to this transport and cannot be used for other transports. The electronic wine accompanying document process (eWeinBV) allows you to create the wine accompanying document online: Before the upcoming transport, log in to the eWeinBV application with your user ID and prepare the electronic wine accompanying document. This will guide you step by step through the necessary information, which you can enter online. Finally, you confirm that all information provided is correct. The accompanying document is created, receives a unique reference number and is unchangeable for you. The transport can begin. All those involved who also take part in the eWeinBV (e.g. wineries, commission agents) can now access the electronic wine accompanying document online or receive it digitally. Submit accompanying documents by post: You fill out the form legibly and completely in four copies. You give the original to the driver. You keep the remaining three copies. The driver hands the original over to the recipient of the wine transport (for example the winery) at the destination. You send two copies by post to the responsible control authority at the loading location no later than one day after the start of the transport. The remaining copy is for your records. All you have to do is create and submit the accompanying document. There is no processing or notification creation by the authority.

Bearbeitungsdauer

It is purely a report; no processing or notice creation takes place.

Frist

There is no deadline. The accompanying document is created immediately before transport. A transport permit from an authority is not necessary.
